Power Tools Treatment Applications

Putting It All Together

Control Corrective Facial Treatment Guide

Control Corrective Signature Peels serve as Power Tools to progressively exfoliate, smooth and revitalize sluggish skin while addressing a variety of common client concerns; fine lines and wrinkles, acne and its aftermath, uneven pigment, loss of elasticity, sun damage and more.

These POWER TOOLS offer the esthetician a variety of exfoliation choices and strengths, enabling you to tailor your treatments precisely to suit your clients, circumstances and environment.

These signature peels also enhance the effectiveness and absorbability of treatment products, both during the facial itself and by your client at home afterwards.

Professional Exfoliation Peel: Light Strength

Zyme Peel Powder + Zyme Peel Activator LIGHT STRENGTH

Our versatile enzyme therapy dramatically enhances the benefits of deep cleansing facials, anti-acne treatments and nurturing spa facials. It refines skin texture by dissolving dead skin cells and clogged pores, and makes extractions much easier too. Highly effective, it offers the added benefit of being a natural alternative to harsher chemical peels.

Skin Types & Conditions

All skin types. Targeted for deep cleansing and gentle resurfacing.

Results & Benefits

- Dissolves dead cell build up
- Stimulates new cell production
- Refines pores and skin texture
- Enhances surface glow

Active Ingredients

Pancreatin, Kaolin, Bromelian, Aloe Vera and Allantoin

Use as part of these Control Corrective Facial Treatments

Enzyme Therapy Facial, Classic Nourishing Facial, C New Brightness Facial, O2 Clear Facial, Beta Clear Facial

Professional Exfoliation Peels: Medium Strength

Mild yet effective “no down time” peels are excellent as a single treatment for immediate refining and glow. Or, done in a series they offer cumulative benefits.

Revitalizing Cream Peel

Here is an elegant solution for skin that is sun damaged, thirsty and parched. A refreshing resurfacing cocktail blended with peptides, AHAs and collagen, Revitalizing Cream Peel diminishes dryness, thoroughly hydrates and increases moisture retention.

Skin Types & Conditions

All skin types. Targeted for hyperpigmented, overly dry or dull skin.

Results & Benefits

- Smooths fine lines and wrinkles
- Refines skin texture
- Increases hydration
- Improves elasticity

Optimal Results

A series of 6 to 8 peels, performed every two weeks, will help strengthen, smooth and hydrate delicate or sensitive skin.

Active Ingredients

Lactic Acid, Salicylic Acid, Acetyl Hexapeptide -3, Retinol, Carica Papaya Fruit Extract, Soluble Collagen

Use as part of these Control Corrective Facial Treatments

Hydrating Cream Peel Facial, Revitalizing Cream Peel

Lactic Green Tea Peel 25%

The “go-to” solution for dull, unevenly pigmented skin, here is peel that efficiently smoothes and brightens skin without causing dryness or dehydration. Green tea and willow herb extract enable the skin to enjoy all of the exfoliating benefits of the AHA lactic acid but without irritation.

Skin Types & Conditions

All skin types. Targeted for hyperpigmented, overly dry or dull skin.

Results & Benefits

- Evens out pigment
- Increases hydration
- Refines texture
- Uncovers brightness

Optimal Results

A series of 8 peels, performed weekly, will deliver deep and lasting brightness and evenness while helping fade stubborn age spots and melasma.

Active Ingredients

Willow Extract, Lactic Acid, Green Tea, Sea Kelp Extract

Use as part of this Control Corrective Facial Treatment

Lactic Action Facial

Gly Peel 33%

Here is an excellent recommendation for clients new to peels because of its visible dramatic results even from the first treatment. By rapidly exfoliating epidermal cells, it instantly unclogs pores, smoothes texture and clarifies the complexion.

Skin Types & Conditions

All non-sensitive skin types. Targeted for sluggish, unevenly textured or acne prone skin.

Results & Benefits

- Dissolves pore-clogging debris
- Smoothes fine lines and wrinkles
- Reduces superficial scars
- Refines texture

Optimal Results

A series of 8 to 10 treatments, performed weekly, will progressively improve skin texture, pigment, brightness and tone, and often control many types of acne. For clients looking for an intensified boost, most complexions can tolerate an 8-week series twice a year. Also excellent as part of monthly maintenance facial.

Active Ingredients

Glycolic Acid 33%, Citric Acid Urea

Use as part of this Control Corrective Facial Treatment

Lighten Up, Tighten Up Facial

Beta Peel 22%

This deep clarifying treatment refines and resurfaces by actively exfoliating the top layers of the stratum corneum, enabling it to penetrate, rid the pores of acne-causing build-up and help fade hyperpigmentation.

Skin Types & Conditions

All skin types. Targeted for active acne or acne-prone skin. Do not use if allergic to aspirin.

Results & Benefits

- Dissolves pore-clogging debris
- Reduces acne lesions and inflammation
- Fades post-blemish hyperpigmentation
- Diminishes and helps prevent scarring

Optimal Results

A series of 8 to 10 treatments, performed weekly, will progressively improve skin texture, pigment, brightness and tone, and often control many types of acne. For clients looking for an intensified boost, most complexions can tolerate an 8-week series twice a year. Also excellent as part of monthly maintenance facial.

Active Ingredients

Salicylic Acid 22%, Vitamin E, Panthenol, Mallow Extract

Use as part of this Control Corrective Facial Treatment

Beta Clear Facial

Professional Exfoliation Peels: Clinical Therapy Strength

This is where peels get more intense and can deliver dramatic improvement.

Dermal Flash Peel

This super-intense, rejuvenating boost not only helps skin look younger but actually start to function younger as well, producing a radiance and tone not found in many other exfoliation procedures. An excellent alternative to exfoliating AHA and BHA peels, the Dermal Flash Peel lightly exfoliates without dryness while offering the significant bonus of increasing microcirculation, oxygenating tissues and delivering visible firming.

Skin Types & Conditions

All non-sensitive skin types. Targeted for mature or sun damaged skin with poor elasticity.

Results & Benefits

- Smoothes fine lines and wrinkles
- Firms and tightens
- Evens out pigment
- Enhances surface glow

Down Time

None.

Optimal Results

A series of 4 peels, performed weekly, will smooth and revitalize neglected, sluggish or dull skin. Also excellent as part of a monthly maintenance facial.

Active Ingredients

Cassia Oil, Phenol, Chloroxylonol

Use as part of this Control Corrective Facial Treatment

Dermal Flash Facial

Clinical Therapy Strength (continued)

Vitamin A Micro Peel

Photo-damage, age spots and melasma are no match for this potent, clinical treatment to progressively fade hyperpigmentation. In addition to efficient exfoliation, it works to increase cell turnover (resulting in new, unpigmented skin cells coming to the surface) and stimulation of collagen production.

Skin Types & Conditions

All non-sensitive skin types. Targeted for uneven texture, photo-damaged or hyperpigmented skin.

Results & Benefits

- Evens out pigment and texture
- Firms and tightens
- Increases hydration
- Enhances surface glow

Down Time

Possible light peeling for up a week.

Optimal Results

A series of 4 peels, performed every two weeks, will accelerate the fading of unwanted pigment. May also be used as a booster or add-on to other exfoliation treatments when needed.

Active Ingredients

Retinol (10%), Lactic Acid

Use as part of this Control Corrective Facial Treatment

Clinical A+ Peel

Clinical Therapy Strength (continued)

Skin Refining TCA Peel

This extremely popular professional-strength peel is for the client who desires more aggressive resurfacing, lifting, smoothing and exfoliation. The remarkable results— and a significant fading of unwanted pigment— make the following week of light skin peeling well worth it.

Skin Types & Conditions

All non-sensitive skin types. Targeted for mature and menopausal skin.

Results & Benefits

- Smooths fine lines and wrinkles
- Firms and tightens
- Fades age spots and hyperpigmentation
- Enhances glow

Down Time

Light noticeable peeling for 4 to 7 days.

Optimal Results

A series of 3 peels, performed from 4 to 6 weeks apart, is ideal for the progressive lifting of stubborn pigmentation, smoothing lines and wrinkles and toning sluggish skin.

Active Ingredients

Trichloroacetic Acid (TCA) 15%, Salicylic Acid, Lactic Acid

Use as part of this Control Corrective Facial Treatment

Clinical A+ Peel

Jessner Solution

An extremely effective and professionally-proven peel that— over a week's time— lifts superficial pigmentation, removes dead skin cells, dissolves clogged pores and helps reverse sun damage. The total regenerating effect delivers smooth, retextured skin not typically achievable with AHA or BHA fruit acid peels.

Skin Types & Conditions

All non-sensitive skin types. Targeted for uneven texture, photo-damaged or hyperpigmented skin.

Results & Benefits

- Smoothes lines and wrinkles
- Heals acne lesions and ingrown hairs (folliculitis)
- Reduces acne scarring
- Evens out pigment

Down Time

Noticeable skin peeling for at least 3 to 4 days and minor flaking for up to another week or so after that. Despite the extent of the peeling, there is no pain or discomfort during recovery. Requires follow-up consultation.

Optimal Results

May be performed as often as every 6 weeks until skin smoothing goals are reached.

Active Ingredients

Un-buffered combination of 14% salicylic acid, 14% lactic acid, and 14% resorcinol in a hydro-alcohol base.

Training Note

Because of the depth of resurfacing and product strength, we strongly recommend that skin therapists complete professional Control Corrective Skin Care Systems training and certification before using the Jessner Peel.

Massage Enhancers

These task-specific wonders work as stand-alone treatments or as part of multi-step procedures for face and body.

Hydra Calm Massage Oil

The ideal medium for facial massage because of its lasting slip, here is a pleasure for both you and the client. The unique wheat germ based, water-dispersable formula restores hydration and essential lipids to skin as it heals irritation. Even clients who are mildly oily but dehydrated can benefit from the highly penetrable, yet non-occlusive formula.

Skin Types & Conditions

All skin types. Targeted for dry, dehydrated, post-peel or product-sensitized skin.

Results & Benefits

- Relaxes tension
- Reduces appearance fine lines and wrinkles
- Calms irritation
- Softens and conditions

Active Ingredients

Soy Oil, Vitamin E, Wheat Germ Oil

Use as part of these Control Corrective Facial Treatments

Hydrating Cream Peel Facial, Lactic Action Peel, C New Brightness Facial

Massage Enhancers (continued)

Skin Nourishing Balm

Stress-reducing, aromatic essential oils turn facial massage into a beautiful thing— pure soothing relief for clients with dry skin. An ultra rich medium for facial massage, Nourishing Balm helps heal the skin's protective barrier while delivering beneficial emollients, vitamins and soothing natural extracts. The herbal formula couples with expert hands to melt away tension and stress.

Skin Types & Conditions

Dry, dehydrated or sensitive skin. Targeted for moisturizing, healing and calming.

When to use

May be used with or without steam.

Results & Benefits

- Relaxes tension
- Replenishes moisture
- Soften and conditions
- Calms irritation

Active Ingredients

Calendula, Chamomile, Shea Butter, Jojoba Oil, Kokum Butter, Comfrey Root, High Altitude Lavender Oil, Sweet Orange Oil, and Vitamin E T50

Used in these Control Corrective Facial Treatments

Classic Nourishing Facial, Hydrating Cream Peel

Specialty Masks

Intensive treatment masks are the winning conclusion to facial treatments.

Firm & Lift Mask + Firm & Lift Activator

Here is the perfect “special event” treatment for the client who wants to enhance luminosity and she wants it done now. Deeply penetrating, this mask immediately tightens and tones, increases microcirculation and leaves the skin feeling totally renewed.

Skin Types & Conditions

All skin types. Targeted for mature or sun damaged skin that has lost elasticity and tone.

Results & Benefits

- Firms and tones
- Enhances glow
- Smoothes texture
- Hydrates

Active Ingredients

R.N.A., L-Lysine, and Proline, Oat flour, Soy Albumin

Use as part of these Control Corrective Facial Treatments

Lighten Up, Tighten Up, Dermal Flash Facial, Eye Lift, Eye Firm Treatment

Specialty Masks (continued)

Vitamin C Brightening Mask Powder + Vitamin C Brightening Mask Activator

This versatile and dynamic antioxidant mask system provides repair, rejuvenation, lightening, firming and purification in one. It is highly effective after exfoliation procedures to calm the skin, and feed the skin a dose of Vitamin C.

Skin Types & Conditions

All skin types. Targeted for sun damaged skin, hyperpigmented, active acne or acne-prone skin.

Results & Benefits

- Enhances brightness and clarity
- Fights free-radical damage
- Reduces inflammation
- Firms and tones

Active Ingredients

L Ascorbic Acid, Aloe Vera Gel, Allantoin, Panthenol, Grapeseed, Lactic, Alpha Hydroxy Acid, Witch Hazel, Ginkgo Biloba

Used in this Control Corrective Facial Treatment

C New Brightness Facial

Treatment Boosters

These task-specific wonders work as stand-alone treatments or as part of multi-step procedures to enhance facial or body treatment results.

O2 Pro Booster

Used to finish off a facial treatment or prior to extractions, the oxygenating action here increases the efficacy of facial treatments by enhancing product absorption. It also kills bacteria on contact without irritating skin. Plus, this concentrated infusion of oxygen into the cells works to instantly encourage skin circulation, vitality and glow.

Skin Types & Conditions

All skin types. Targeted for mature, dull, sluggish or acne-prone skin.

Results & Benefits

- Enhances treatment product absorption
- Unclogs pores
- Clears acne lesions and inflammation
- Enhances surface glow

Active Ingredients

Stabilized Hydrogen Peroxide, Salicylic Acid, Glycolic Acid, Vitamin A Ester, Eucalyptus and Jasmine Oil

Use in these Control Corrective Facial Treatments

O2 Clear Facial, Lactic Action Facial

Putting It All Together

Different combinations of the POWER TOOLS described above are the components of our signature Control Corrective facial treatments. For full instructions on their usage, refer to Technical Manual.

We have organized our Control Corrective treatments by intensity level within each collection.

Spa Therapy 1: For resort and day spas catering to transient guests. Level 1 treatments emphasize both relaxation and skin refreshment, making them ideal for first time facial guests.

Advanced Therapy 2: For both aestheticians and consumers who are comfortable with a higher degree of treatment intensity and are savvy to facial therapies.

Clinical Therapy 3: For medical spas and clinical aestheticians who seek assertive skin therapies. These treatments require advanced Control Corrective training and additional client consultation and follow up.

For your reference at a glance, here they all are in chart form:

Control Corrective Facial Treatments

Spa Therapy 1	Advanced Therapy 2	Clinical Therapy 3
	Acne Cleansing and Clarity	
Clarifying Enzyme Facial	O2 Clear Facial	Beta Clear Facial
	Anti-Aging and Rejuvenation	
Hydrating Cream Peel Facial	Lighten Up, Tighten Up	Dermal Flash Treatment
	Sensitive Skin and Redness	
Classic Nourishing Facial	Botanical Soothing Facial	Revitalizing Cream Peel
	Sun Damage Reversal	
C New Brightness Facial	Lactic Action Peel	Clinical A+ Peel
	Specialty	
Eye Lift, Eye Firm Treatment	Smoothing A.H.A Body Peel	7 Day Skin Rejuvenation with Jessner Peel

Deep Cleansing and Acne Clearing

Clarifying Enzyme Facial

Spa Therapy 1

For: All skin types, from acne-prone to those with active breakouts.

This highly effective yet gentle exfoliating facial offers a natural alternative to harsher chemical peels. A cocktail of botanical enzymes dissolves pore-clogging debris while balancing, softening and purifying skin, all without irritation. Smoother texture, visibly diminished pores and refreshing non-comedogenic hydration complete the picture. An excellent introduction to acne facials, the Clarifying Enzyme Facial works equally as well on sensitized and flaking Accutane-parched complexions as it does on overactive oily skin.

O2 Clear Facial

Advanced Therapy 2

For: Sluggish, Non-sensitive Acne-prone Skin That is Unresponsive to Topical Regimens

This skin-repairing treatment fights difficult acne on two fronts. First, advanced enzyme technology puts new muscle into deep cleaning exfoliation by dissolving pore-clogging sebum sludge and cellular debris. Next, the enhanced oxygen cream deeply purifies and softens pore clogging congestion, kills acne bacteria, and delivers much needed nutrition into the skin. The result? Not only are blemishes banished and large pores visibly diminished, but overall skin quality, tone and smoothness are enhanced as well. Particularly effective for smokers and those with a congested texture.

Beta Clear Facial

Clinical Therapy 3

For: Stubborn, Non-Sensitive Acne-Prone Skin That is Both Sun-Damaged and Unresponsive to Topical Regimens

Our strongest anti-acne facial doubles up on the exfoliation to rid skin of both acne and sun damage (age spots, wrinkles, uneven texture). Following advanced enzyme technology with active salicylic acid this facial takes surface exfoliation to a new level (that is, a whole lot deeper). Sticky, hardened pore-clogging oils, debris and bacteria are swept away as unwanted pigment and textural irregularities are literally smoothed off the skin. Emptied of impurities, pores become more responsive to the healing and smoothing mask and serums to follow. Ideal for those with adult acne who are also concerned with aging issues. Not suitable for those who are allergic to aspirin.

Anti-Aging Rejuvenation

Hydrating Cream Peel Facial

Spa Therapy 1

For: All Skin Types Showing Early to Medium Signs of Aging and Sun Damage

This gentle hydrating facial helps smooth lines, wrinkles and uneven texture as it soothes and renews. The lactic acid and peptide peel—sweeping away dead skin cells that dull the complexion—offers efficient exfoliation without any worry of redness, sensitivity or dryness. An excellent introduction to anti-aging facials, this pampering treatment is ideal as monthly maintenance for dry, sensitive or any other skin type craving comfort, restoration and hydration.

Lighten Up, Tighten Up Facial

Advanced Therapy 2

For: Mature, Non-Sensitive Skin Types Showing Signs of Aging, Sun Damage and Loss of Elasticity

This serious, rejuvenating facial is really into power lifting. Penetrating alpha hydroxy acids get to the bottom of lines, wrinkles, roughness, age spots and other irregularities to uncover fresh, smooth new skin underneath. A remarkable extreme lift mask that gets tighter than tight as it dries, topped off with a skin-plumping serum delivers immediate firmness, renewed tone and textural consistency. Best done in a series of 3 or 4 or as a monthly anti-aging maintenance program.

Dermal Flash Treatment

Clinical Therapy 3

For: Mature, Non-Sensitive Skin Types Showing Signs of Aging, Sun Damage and Loss of Elasticity

This rejuvenating treatment dials up the heat to deliver renewed skin smoothness and vibrancy to dull, aging and sun-damaged skin. Fueled by warming cinnamon extract, the deeply exfoliating Dermal Flash Peel increases circulation and gets skin glowing as it helps smooth wrinkles and fade unwanted pigment. Serums enhance surface plumpness and elasticity; a super lift mask cools things down as it firms and tones. Can be done monthly or alternated with the Lighten up Tighten Up Facial as part of a regular anti-aging maintenance program.

Stress, Sensitivity & Redness Relief

Classic Nourishing Facial

Spa Therapy 1

For: All Skin Types Showing Dryness, Dehydration, Stress, Exhaustion or Jet Lag

This modern update can trace its roots back the grand European spa tradition. Nourishing the skin, relaxing the system and soothing the soul are all part of this luxurious refresher. Thorough, but oh so gentle, deep cleansing with exfoliating enzymes lifts away dry, flaking dead cells and surface toxins. Massage with an aromatic natural herbal balm, infusion of botanical serum and application of a creamy soothing mask help skin soak up the rejuvenating hydration. The complexion emerges looking fresh, dewy and radiant. Perfect to give as a gift certificate for birthdays, bridal parties and anniversaries.

Botanical Soothing Facial

Advanced Therapy 2

For: Sensitive, Rosacea-Prone, Post-chemically Peeled, Stressed or Sunburned Skin

This cooling soother instantly subdues angry inflammation, visible redness, unsightly blotchiness and reactivity tantrums. Non-irritating gentle enzyme skin polishing removes dry, flaking skin and surface irritants, followed by an anti-inflammatory botanical serum infusion. Placement of smooth therapeutic cold stones onto hot spots pulls the heat out and leaves cooling relaxation in its place. The restorative, moisture-replenishing mask completes the peace and quiet, all to leave you feeling totally at ease and comfortable in your own skin.

Revitalizing Cream Peel

Clinical Therapy 3

For: Sensitive Skin

This gentle hydrating facial replaces lines, wrinkles and uneven texture with deep, calming moisture. The lactic acid and peptide peel—sweeping away dead skin cells that dull the complexion—offers efficient exfoliation without any worry of redness, sensitivity or dryness. A polishing enzyme mask keeps the complexion smooth with penetrating hydration. Appropriate as a follow-up to laser resurfacing, this nurturing treatment is ideal as monthly maintenance for dry, sensitive or any other skin type craving comfort and restoration.

Sun Damage Repair and Reversal

C New Brightness Facial

Spa Therapy 1

For: All Skin Types Showing Sun Damage and Uneven Pigment and Texture

This Vitamin C-fueled brightening facial helps fade age spots and smooth out rough, thickened texture on the face, neck, décolletage and body – all without irritation. Alpha hydroxy acid peeling brightens things up by removing dead, dull and discolored cells to uncover fresh new skin underneath. An antioxidant serum infusion, brightening Vitamin C mask and wheat-germ-based massage help minimize pores, refine texture, fade surface pigmentation and accelerate skin repair. Skin emerges so smooth, even and luminous, it looks like it's lit from within. Best done in a series for cumulative skin-brightening and smoothing results.

Lactic Action Peel

Advanced Therapy 2

For: All Non-Sensitive Skin Types Showing Ashiness, Sun Damage or Uneven Pigment and Texture

When the skin gets dull, mottled and sun damaged, the bright get peeling. A lactic acid exfoliating peel gets right to the source of unwanted discoloration – anything from ashiness to age spots to stubborn acne traces – dissolving rogue pigment cells on the spot, and clearing away aging dead surface cell sludge while it's at it. Healthy even new cells also see the light of day replacing lines, wrinkles and roughness. Oxygen emulsion increases cellular microcirculation, adds water to the cells and helps pull powerful skin brightening and antioxidants deep into the skin. What you get is a renewed texture so radiant and bright it'll make you happy just to look at it. Best done in a series for cumulative results.

Clinical A+ Peel

Clinical Therapy 3

For: All Non-Sensitive Skin Types Showing Extreme Sun Damage, Aging, Uneven Pigment and Texture, Ashiness or Melasma

This rejuvenating powerhouse of a facial treatment picks up where others have left off. Specifically developed for the motivated client who wants the renowned skin smoothing and brightening results of laser resurfacing but who cannot afford the down time, this clinically proven treatment helps improve skin texture and firmness, reduce the signs of aging (lines, wrinkles) and reverse the signs of sun damage (age spots, uneven pigment, roughness). TCA, a proven anti-aging peeling agent, paired up with skin rejuvenating Vitamin A work synergistically to deliver age defying results. Expect to experience some peeling for a few days after the treatment but once the week is out, welcome to your absolutely gorgeous and glowing new face! Best done in a series for cumulative firming, smoothing and rejuvenating results.

Specialty Treatments

Eye Lift, Eye Firm Treatment

Spa Therapy 1

For: All Skin Types Showing Signs of Aging Around the Eye Area

This gentle, yet effective eye smoothing and firming treatment results in smoother skin texture, fewer lines and wrinkles, increased firmness and elasticity and dryness-soothing hydration. Ideal as an add-on to other facial treatments.

Smoothing A.H.A. Body Peel

Advanced Therapy 2

For: All Non-Sensitive Skin Areas — Hands, Feet, Arms, Legs, Back, Decolletage, Chest or Scalp— with Unwanted Dryness, Roughness, Crepe-Like Texture, Hyperpigmentation, Acne Scars, Raised Stretch Marks, Keratosis Pilaris, Calluses or Sun Damage.

This go-to treatment for those looking to rejuvenate or smooth out their body's skin leaves these areas looking younger, firmer, smoother and more even. A deep exfoliating glycolic acid peel dissolves the top layer of skin imperfections followed by a serum that rehydrates and softens the skin. The digestive enzyme mask finishes off with extra smoothing and hydration. Ideal for those who already have a youthful-looking face and want the rest of their body to match up.

7 Day Deep Skin Rejuvenation Treatment

Clinical Therapy 3

For: All Non-Sensitive Skin Types Who Have Already Had AHA Peels or Microdermabrasion Treatments but Want to Take Their Anti-Aging Results to a Deeper Level. Best on Those With Naturally Fair to Medium Skin Pigmentation.

This highly specialized, progressive epidermal peel significantly reverses signs of aging and/or treats resistant, impacted acne. For a day or two after application, the face looks slightly sunburned and does not peel. After that however, the depth and intensity of this treatment requires about a week of down time as the skin flakes away to emerge totally renewed. During recovery, lines, wrinkles, scars, dullness, hyper-pigmentation (in lighter complexions), blackheads, whiteheads and ingrown hairs all appear to peel off and away. A hydrating post-treatment done a week later fortifies newly refined and luminous skin with concentrated moisture.
